

A Bluetooth speaker range with a perfect fit for everyone

NEW: Fabric series

With the ever increasing popularity of mobile devices in mind, Nedis® has introduced a new assortment of Bluetooth™ speakers. Nowadays, a Bluetooth speaker is not just a device; it reflects a personal lifestyle. That's why Nedis® offers different series. The full assortment covers a wide price range to make the solutions accessible to everyone and a perfect fit per individual.

In the spotlight: Fabric series

There's one thing all products of this line-up have in common: a stylish fabric finish covering the speaker. With intuitive and good looking soft-touch buttons the speakers are easy-to-use and a great asset to a vibrant lifestyle. You can use the products fresh out of the box without having to follow difficult instructions. Simply connect your device via Bluetooth™ (version 4.2).

Since the speakers are wireless and lightweight the products are perfect to take with you wherever you go. In fact the speakers are specially made to be used outdoors. The IPX4 waterproofing even makes sure that a little bit of rain doesn't have to stop the party and the largest model even boasts a 360° cover.

The latest True Wireless Stereo (TWS) technology is integrated so users can double the audio to a maximum peak power output of 2x45W. Furthermore the battery per product contains 4000 mAh which equals up to 4 hours play time per single charge.

SPBT2003BU
